Section Id :	82778811
Section Number :	1
Section type :	Online
Enable Mark as Answered Mark for Review and Clear Response :	Yes
Maximum Instruction Time :	0
Sub-Section Number :	1
Sub-Section Id :	82778813
Question Shuffling Allowed :	Yes
Is Section Default? :	null

Question Number : 1 Question Id : 8277881303 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The linkages in the amylose fraction of starch are:

Options :

1. ✓ Alpha - 1, 4, glycosidic linkages
2. ✗ Beta - 1, 4, glycosidic linkages
3. ✗ Beta - 1, 6, glycosidic linkages
4. ✗ Alpha - 1, 6, glycosidic linkages

Question Number : 2 Question Id : 8277881304 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements regarding Pectic substances is INCORRECT?

Options :

1. ✗ Pectin occurs chiefly in the cell wall of plants, and also in cell sap
2. ✓ Protopectin is soluble in water and is found only in the cell sap
3. ✗ In the presence of 65% to 70% sugar and a pH of 3.2 to 3.5 pectin can form a gel
4. ✗ Pectin is the methyl ester of pectic acid

Question Number : 3 Question Id : 8277881305 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements regarding Dietary Fibre is INCORRECT?

Options :

1. ✗ Insoluble fibre stimulates peristalsis and prevents constipation
2. ✗ Soluble fibre helps decrease blood cholesterol and promotes growth of intestinal microbiota
3. ✗ Whole grains, fruits and vegetables and algae are rich sources of fibre

4. ✓ It is a complex carbohydrate providing 4 kcal/g

Question Number : 4 Question Id : 8277881306 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Casein is an example of which type of protein?

Options :

1. ✗ Lipoprotein
2. ✓ Phosphoprotein
3. ✗ Glycoprotein
4. ✗ Metalloprotein

Question Number : 5 Question Id : 8277881307 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Fatty acids with cis-cis methylene interrupted double bonds are called:

Options :

1. ✗ Monounsaturated fats
2. ✓ Polyunsaturated fats
3. ✗ Omega-3 fats
4. ✗ Trans fats

Question Number : 6 Question Id : 8277881308 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Natural antioxidants found in oils include all of the following except:

Options :

1. ✗ Oryzanol
2. ✗ Tocopherol
3. ✗ Tocotrienol
4. ✓ Tert-butyl hydroquinone

Question Number : 7 Question Id : 8277881309 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements regarding Chlorophyll is INCORRECT?

Options :

1. ✗ Chlorophyll is a fat soluble pigment present in plants as Chlorophyll a and Chlorophyll b
2. ✓ Chlorophyll b differs from Chlorophyll a as Chlorophyll b has a methyl group at 'R' position

3. ✖ Pheophytin forms when magnesium is replaced by hydrogen in chlorophyll
4. ✖ Chlorophyllin forms in an alkaline medium

Question Number : 8 Question Id : 8277881310 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The pigment anthoxanthin changes colour and becomes bright yellow in:

Options :

1. ✔ An alkaline medium
2. ✖ An acidic medium
3. ✖ On oxidation
4. ✖ When cooked in a stainless steel container

Question Number : 9 Question Id : 8277881311 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which of the following is used as a flavour enhancer in foods like chocolate, baked products and instant coffee?

Options :

1. ✖ Glutamic acid
2. ✔ Maltol
3. ✖ Nucleotides
4. ✖ Salt substitutes

Question Number : 10 Question Id : 8277881312 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The volatile flavour and aroma of almonds is due to the compound:

Options :

1. ✖ Hexanal
2. ✔ Benzaldehyde
3. ✖ Isopentyl acetate
4. ✖ 2-methyl butyrate

Question Number : 11 Question Id : 8277881313 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The major constituent of citrus essential oils is:

Options :

1. ✓ Limonene
2. ✗ Hesperidin
3. ✗ Naringenin
4. ✗ Geranial

Question Number : 12 Question Id : 8277881314 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements is INCORRECT with respect to Enzymatic Browning?

Options :

1. ✓ It takes place in all fresh fruits and vegetables
2. ✗ Browning is seen when cellular organization is disrupted by cutting, bruising or injuring the tissue
3. ✗ It can be prevented by inactivating the enzymes and avoiding contact with oxygen
4. ✗ It can be prevented by lowering the pH and making it acidic

Question Number : 13 Question Id : 8277881315 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The browning reaction between certain free groups of amino acids such as NH_2 and reducing sugars is called:

Options :

1. ✗ Caramelization
2. ✓ Maillard Reaction
3. ✗ Enzymatic browning
4. ✗ Ascorbic acid browning

Question Number : 14 Question Id : 8277881316 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The principal flavouring agent naturally present in the spice cloves is:

Options :

1. ✗ Piperidine
2. ✗ Thymol
3. ✓ Eugenol
4. ✗ Menthol

Question Number : 15 Question Id : 8277881317 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

In which one of the following microorganisms is the nuclear material not surrounded by a nuclear membrane?

Options :

1. ✖ Fungi
2. ✖ Algae
3. ✖ Protozoa
4. ✔ Bacteria

Question Number : 16 Question Id : 8277881318 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which of the following microorganisms has very little direct impact on production, processing and consumption of food?

Options :

1. ✔ Algae
2. ✖ Bacteria
3. ✖ Molds
4. ✖ Yeast

Question Number : 17 Question Id : 8277881319 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Generally the temperature required to destroy bacterial spores as compared to the temperature to destroy vegetative bacterial cells is approximately:

Options :

1. ✔ 30 °C to 45 °C higher
2. ✖ 10 °C to 25 °C higher
3. ✖ Same as that for vegetative cells
4. ✖ 10 °C lower than that for vegetative cells

Question Number : 18 Question Id : 8277881320 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which statement is INCORRECT with respect to yeast?

Options :

1. ✖ They are both useful and harmful
2. ✖ They are grown for enzymes and for food
3. ✔ Sexual reproduction by formation of ascospores is seen in False Yeasts
4. ✖ Yeasts reproduce by budding or fission

Question Number : 19 Question Id : 8277881321 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following bacteria causes 'Bacillary Dysentery'?

Options :

1. ✓ **Shigella**
2. ✗ **Bacillus**
3. ✗ **Campylobacter**
4. ✗ **Listeria**

Question Number : 20 Question Id : 8277881322 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following is referred to as an indicator of faecal pollution?

Options :

1. ✗ **Erwinia**
2. ✗ **Faecal coliforms**
3. ✗ **Enterococci**
4. ✓ **Escherichia coli**

Question Number : 21 Question Id : 8277881323 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following microorganisms are destroyed during pasteurization of milk?

Options :

1. ✓ **Yeasts, molds and most vegetative cells of bacteria**
2. ✗ **Streptococcus thermophiles and Bacillus cereus**
3. ✗ **Lactobacillus bulgaricus and Lactobacillus lactis**
4. ✗ **Species of Microbacterium and Micrococcus**

Question Number : 22 Question Id : 8277881324 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Surface slime, whiskers, stickiness and changes in colour of pigments are some of the signs of spoilage typically seen in:

Options :

1. ✓ **Meat**
2. ✗ **Vegetables**
3. ✗ **Milk**
4. ✗ **Frozen desserts**

Question Number : 23 Question Id : 8277881325 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Species of Serratia can grow in milk and change the colour to:

Options :

1. ✖ Green
2. ✔ Red
3. ✖ Brown
4. ✖ Blue

Question Number : 24 Question Id : 8277881326 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Pseudomonas putrefaciens can grow in butter and spoil it by developing a 'sweaty feet odour' and this defect is called:

Options :

1. ✔ Rabbito
2. ✖ Barny odour
3. ✖ Tallowiness
4. ✖ Fishiness

Question Number : 25 Question Id : 8277881327 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which one of the following is a mycotoxin?

Options :

1. ✖ Furocoumarins
2. ✖ Glucosinolates
3. ✔ Fumonisin
4. ✖ Chaconine

Question Number : 26 Question Id : 8277881328 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

What is the most common hazard found in food?

Options :

1. ✖ Allergenic
2. ✔ Biological

3. ✖ Chemical

4. ✖ Physical

Question Number : 27 Question Id : 8277881329 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Preservatives permitted in certain dairy products include all of the following EXCEPT:

Options :

1. ✖ Sorbic acid in cottage cheese

2. ✖ Propionic acid in yoghurt

3. ✔ Hydrogen peroxide in milk

4. ✖ Sugar in sweetened condensed milk

Question Number : 28 Question Id : 8277881330 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which of the following antinutrients binds to iron, zinc and calcium and adversely affects their bioavailability?

Options :

1. ✔ Myoinositol hexaphosphate

2. ✖ Protease inhibitors

3. ✖ Tetrahydrolipstatin

4. ✖ Glycosinolates

Question Number : 29 Question Id : 8277881331 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Azaspiracid poison is a toxin found in:

Options :

1. ✖ Pesticide residues

2. ✖ Cereal grains

3. ✔ Shellfish

4. ✖ Mushrooms

Question Number : 30 Question Id : 8277881332 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

FSSAI has set regulations which specify permissible limits for which one of the following biogenic amines found in fish and fish products?

Options :

1. ✖ Putrescine
2. ✔ Histamine
3. ✖ Spermidine
4. ✖ Cadaverine

Question Number : 31 Question Id : 8277881333 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The local name for Garcinia indica, a dried sour fruit rich in anthocyanin is:

Options :

1. ✔ Kokum
2. ✖ Cranberry
3. ✖ Karonda
4. ✖ Indian Black berry

Question Number : 32 Question Id : 8277881334 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Dried milk powder and sweetened condensed milk darken on prolonged storage because of:

Options :

1. ✔ Maillard browning
2. ✖ Dextrinization
3. ✖ Caramelization
4. ✖ Lipid browning

Question Number : 33 Question Id : 8277881335 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Carotenoid pigments are lost to a considerable extent by:

Options :

1. ✖ Normal cooking of food
2. ✔ Exposure to air or oxidation
3. ✖ Cooking food in a mildly acidic medium
4. ✖ Leaching into cooking liquor

Question Number : 34 Question Id : 8277881336 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following does not contribute to the astringent taste in fruits and vegetables?

Options :

1. ✖ Tannins
2. ✖ Catechins
3. ✔ Zeaxanthin
4. ✖ Leucoanthocyanins

Question Number : 35 Question Id : 8277881337 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Where on the tongue is sour taste detected?

Options :

1. ✔ Sides
2. ✖ Back
3. ✖ Tip
4. ✖ Centre

Question Number : 36 Question Id : 8277881338 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which one statement is INCORRECT with respect to Personnel facilities and toilets?

Options :

1. ✔ Food should be consumed in the rest room by employees
2. ✖ Separate locker rooms should be provided for men and women for changing
3. ✖ Hygienic requirements for workers should be displayed at a prominent place to help them implement hygienic practices
4. ✖ Ideally there should be one hand wash basin for every 15 to 20 employees

Question Number : 37 Question Id : 8277881339 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which of the following oils has a low smoke point?

Options :

1. ✖ Canola oil
2. ✖ Extra virgin olive oil
3. ✔ Flaxseed oil
4. ✖ Peanut oil

Question Number : 38 Question Id : 8277881340 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

As per regulations, which of the following statements is INCORRECT with respect to procurement of raw materials?

Options :

1. ✖ Purchases should be made only from reliable and known dealers and records maintained for the same
2. ✖ Every supplier should submit a warranty in Form E
3. ✖ All raw materials received should be checked thoroughly
4. ✔ Receiving temperature for potentially high risk food should be at or below 10 °C

Question Number : 39 Question Id : 8277881341 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The temperature range in which most microorganisms grow best in our food (Danger Zone) is:

Options :

1. ✖ 1 °C to 51 °C
2. ✖ 0 °C to 70 °C
3. ✖ 4 °C to 65 °C
4. ✔ 5 °C to 63 °C

Question Number : 40 Question Id : 8277881342 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Blast freezing is preferred to slow freezing because:

Options :

1. ✖ Food freezes gradually in a blast of cold air
2. ✖ Large ice crystals are formed in food
3. ✖ Blast frozen food can be stored indefinitely in the refrigerator
4. ✔ Very small ice-crystals form in frozen food

Question Number : 41 Question Id : 8277881343 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

While sanitizing equipment and utensils manually in the three sink method, the recommended contact time with chlorinated water (strength 100 to 200 ppm) is up to:

Options :

1. ✖ 20 minutes
2. ✖ 10 minutes
3. ✖ 5 minutes
4. ✔ 2 minutes

Question Number : 42 Question Id : 8277881344 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The branch of microbiology which deals with the study of diatoms and dinoflagellates is:

Options :

1. ✖ Mycology
2. ✔ Algology
3. ✖ Nematology
4. ✖ Immunology

Question Number : 43 Question Id : 8277881345 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The toxin produced by Clostridium botulinum is:

Options :

1. ✖ Phycotoxin
2. ✔ Neurotoxin
3. ✖ Enterotoxin
4. ✖ Hepatotoxin

Question Number : 44 Question Id : 8277881346 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The main acid formed in fermented vegetable pickles which helps preserve the pickle is:

Options :

1. ✖ Tartaric acid
2. ✖ Citric acid
3. ✖ Fumaric acid
4. ✔ Lactic acid

Question Number : 45 Question Id : 8277881347 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

A traditional pickled vegetable of Korea prepared from cabbage, radish and other seasonings is:

Options :

1. ✔ Kimchi
2. ✖ Gundruk
3. ✖ Sunki
4. ✖ Mesu

Question Number : 46 Question Id : 8277881348 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

On the basis of ease of spoilage, potatoes, onion and garlic are classified as:

Options :

1. ✖ Non-perishable
2. ✔ Semi-perishable
3. ✖ Perishable
4. ✖ Stable

Question Number : 47 Question Id : 8277881349 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following preservation treatments will slow down the growth of microorganisms?

Options :

1. ✖ Pasteurization
2. ✖ Radurization
3. ✔ Vacuum packaging
4. ✖ Radicidation

Question Number : 48 Question Id : 8277881350 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following is an inorganic preservative?

Options :

1. ✖ Parabens
2. ✖ Benzoate
3. ✔ Nitrite
4. ✖ Sorbate

Question Number : 49 Question Id : 8277881351 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The process of homogenization of milk is an example of which of the following Unit Operations?

Options :

1. ✖ Separating
2. ✔ Disintegrating
3. ✖ Mixing

4. ✖ Forming

Question Number : 50 Question Id : 8277881352 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Barley which has been polished to remove some or all of the outer bran layer along with the hull is known as:

Options :

1. ✖ Barley Groats
2. ✖ Hulled Barley
3. ✔ Pearl Barley
4. ✖ Scotch Barley

Question Number : 51 Question Id : 8277881353 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements is INCORRECT with respect to malting of barley grains for manufacture of beer?

Options :

1. ✖ Malt is barley grains germinated till roots and stem just begin to appear
2. ✖ Green malt is gently dried to stop growth of germinated grain, keeping enzymes intact
3. ✖ Enzymes in germinated grains convert starches in the grain to sugars
4. ✔ Yeast can utilize starch in the grains and convert it to ethanol and CO₂

Question Number : 52 Question Id : 8277881354 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The product obtained by milling wheat in which bran and germ are wholly/partially removed and remainder comminuted to a suitable degree of fineness is called:

Options :

1. ✖ Atta
2. ✖ Dalia
3. ✖ Couscous
4. ✔ Semolina

Question Number : 53 Question Id : 8277881355 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which of the following statements is INCORRECT with respect to the aleurone layer in the wheat grain?

Options :

1. ✖ It is the outermost layer of the endosperm of the grain
2. ✖ More than 80 percent of minerals of the wheat kernel are concentrated in this layer
3. ✖ It is lost along with bran when wheat is milled
4. ✔ In wheat grain, the aleurone tissue consists of multiple layers of cells

Question Number : 54 Question Id : 8277881356 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which of the following is obtained by Dry Milling of corn?

Options :

1. ✖ Corn starch
2. ✖ Corn syrup
3. ✔ Corn meal
4. ✖ Dextrin

Question Number : 55 Question Id : 8277881357 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Products obtained by Wet Milling of corn kernels include all of the following EXCEPT:

Options :

1. ✖ Corn protein rich in Zein
2. ✖ Refined corn oil
3. ✖ Dextrose
4. ✔ Corn flour

Question Number : 56 Question Id : 8277881358 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

What is the minimum percentage of lean meat required as per Regulations in a comminuted or restructured meat product?

Options :

1. ✔ 25%
2. ✖ 40%
3. ✖ 50%
4. ✖ 75%

Question Number : 57 Question Id : 8277881359 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The minimum percentage of fruit juice/puree required as per Regulations in a fruit squash is:

Options :

1. ✖ 15%
2. ✖ 20%
3. ✔ 25%
4. ✖ 35%

Question Number : 58 Question Id : 8277881360 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements is INCORRECT regarding pasteurization of milk for cheese making?

Options :

1. ✖ Pasteurization prevents transmission of pathogens by killing them
2. ✖ It improves the keeping quality of milk
3. ✔ Makes milk commercially sterile
4. ✖ Destroys microorganisms that could interfere with activities of desirable microorganisms in the starter culture

Question Number : 59 Question Id : 8277881361 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Trichinosis is caused by:

Options :

1. ✖ Sewage contamination of drinking water
2. ✔ Incompletely cooked infected pork
3. ✖ Raw or insufficiently cooked fish from oceans
4. ✖ Improperly washed root vegetables grown in sewage fertilized farms

Question Number : 60 Question Id : 8277881362 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The method for curing meat when the curing ingredients are rubbed into the meat is known as:

Options :

1. ✖ The direct addition method
2. ✖ The injection cure
3. ✖ The pickle cure
4. ✔ The dry cure

Question Number : 61 Question Id : 8277881363 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Correct Marks : 1 Wrong Marks : 0.33

A method in which food is preserved by reducing water activity without heating food, and better retention of nutrients and sensory characteristics: (delicate aromas, texture and superior quality)

Options :

1. ✖ Explosion puff drying
2. ✖ Evaporation / dehydration
3. ✖ Solar drying
4. ✔ Freeze drying

Question Number : 63 Question Id : 8277881365 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Homogenized milk has a creamier texture and increase in viscosity as size of fat globules is less than:

Options :

1. ✖ 10 µm
2. ✔ 1 µm
3. ✖ 1 mµ
4. ✖ 10 mµ

Question Number : 64 Question Id : 8277881366 Question Type : MCQ Option Shuffling : Yes Is

Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum

Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Heat sterilization of food before filling it into pre-sterilized containers in a sterile atmosphere is known as:

Options :

1. ✖ In-container sterilization
2. ✖ Radappertization
3. ✔ Aseptic processing
4. ✖ Retorting

Question Number : 65 Question Id : 8277881367 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Although proper packaging is necessary to keep contaminants away, which of the following processes does not rely on packaging to maintain sterility of the product?

Options :

1. ✖ Heat sterilization
2. ✖ Irradiation
3. ✖ Ohmic heating
4. ✔ Added Chemical preservatives/frozen desserts

Question Number : 66 Question Id : 8277881368 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which one statement is INCORRECT with respect to blanching?

Options :

1. ✖ Assists in subsequent preservation by reducing the numbers of microorganisms on the surface of foods
2. ✔ The absence of residual polyphenol oxidase, a heat resistant enzyme marker indicates that other less heat resistant enzymes are also inactivated
3. ✖ Main function is to destroy enzymic activity in vegetables and some fruits prior to processing
4. ✖ A majority of vegetables suffer some loss in quality if this pretreatment is not carried out correctly

Question Number : 67 Question Id : 8277881369 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

FBOs can minimise food waste generated in the all of the following ways, EXCEPT by _____ that relates to the recycling of foods.

Options :

1. ✖ storing all commodities in the correct storage areas
2. ✖ checking all commodities on receipt and before keeping them in place
3. ✖ reading labels for 'Best before date' and 'Use by date'
4. ✔ using food waste as animal feed by feeding leftovers to pigs or poultry or make compost

Question Number : 68 Question Id : 8277881370 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which Sensory Evaluation Test is used when young children with limited reading ability form the panelists?

Options :

1. ✔ Facial Hedonic Scale

2. ✖ Score Cards
3. ✖ Profiling
4. ✖ Dilution Test

Question Number : 69 Question Id : 8277881371 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Which statement is INCORRECT with respect to Objective Evaluation?

Options :

1. ✖ These methods do not depend on human senses
2. ✖ They are more reliable as they are less subject to error
3. ✔ They can help us appreciate flavours and decide whether we like the food or not
4. ✖ Well maintained, accurate testing devices are used to measure properties like nutrients, pH of food

Question Number : 70 Question Id : 8277881372 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

Packaging material required for Modified Atmosphere Packaging (MAP) which can protect the product from oxygen to the end of its expected shelf-life should have:

Options :

1. ✖ Low barrier properties
2. ✖ Medium barrier properties
3. ✖ High barrier properties
4. ✔ Ultra-high barrier properties

Question Number : 71 Question Id : 8277881373 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The process that helps target, identify and rectify defects in finished food products is:

Options :

1. ✖ Quality Assurance
2. ✔ Quality Control
3. ✖ Quality Improvement
4. ✖ Quality Management

Question Number : 72 Question Id : 8277881374 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical

Correct Marks : 1 Wrong Marks : 0.33

The testing device used to measure the tenderness of meat is the:

Options :

1. ✖ Shortometer
2. ✖ Succulometer
3. ✔ Penetrometer
4. ✖ Compressimeter

Question Number : 73 Question Id : 8277881375 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The first step in the new product development process is:

Options :

1. ✖ Testing
2. ✖ Prototyping
3. ✔ Ideation
4. ✖ Commercialization

Question Number : 74 Question Id : 8277881376 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

The temperature of raw milk received through Bulk Chilling Centres should be maintained at or below:

Options :

1. ✖ 10 °C
2. ✖ 8 °C
3. ✔ 5 °C
4. ✖ 1 °C

Question Number : 75 Question Id : 8277881377 Question Type : MCQ Option Shuffling : Yes Is Question Mandatory : No Calculator : None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Negative Marks Display Text : 1/3 Option Orientation : Vertical Correct Marks : 1 Wrong Marks : 0.33

Which one of the following statements is INCORRECT with respect to oleoresins?

Options :

1. ✔ Essential oils are stronger in flavour than their corresponding oleoresins
2. ✖ Oleoresins are obtained when a spice is extracted with a hydrocarbon solvent
3. ✖ They are 5 to 20 times stronger in flavour than their corresponding spice
4. ✖ Heavy oils of oleoresins contain some important flavour notes that are absent in volatile oils
